

a table presentation module that presents one or more selected table portions in a graphical user interface;

A
a user-selectable graphics presentation module that presents one or more user-selectable graphical portions in the graphical user interface, wherein each user selectable graphical portion corresponds to one or more table portions; and

a user selection module for enabling a user to select the one or more user-selectable graphical portions to cause the presentation table to present a table portion associated with the selected one or more user-selectable graphical portions.

SUB 6. **(Amended)** A system for presenting table information, the table comprising a plurality of table portions, the table portions comprising a plurality of rows and columns, the system comprising:

table presentation means for presenting one or more selected table portions in a graphical user interface;

A2
user-selectable graphics presentation means for presenting one or more user-selectable graphical portions in the graphical user interface, wherein each user selectable graphical portion corresponds to one or more table portions; and

user selection means for enabling a user to select the one or more user-selectable graphical portions to cause the presentation table to present a table portion associated with the selected one or more user-selectable graphical portions.

Sub B3 11. **(Amended)** A method for presenting table information, the table comprising a plurality of table portions, the table portions comprising a plurality of rows and columns, the method comprising:

A3
partitioning a table into one or more portions;
selecting one or more of the portions and presenting the one or more portions in a graphical user interface;
assigning other portions of the table to one or more user-selectable graphics portions;
presenting one or more of the user-selectable graphics portions in the graphical user interface; and
enabling a user to select the user-selectable graphics portion to present a table portion associated with the selected user-selectable graphics portion.

Sub C4 13. **(Amended)** The method claim 11 wherein the step of partitioning the table comprises partitioning the table into groups of one or more table portions and wherein the step of selecting comprises selecting one or more table portions and the step of presenting comprises presenting one or more table portions.

Sub B4 16. **(Amended)** A computer usable medium having computer readable program code means embodied therein for presenting table information, the table comprising a plurality of table portions, the table portions comprising a plurality of rows and columns, the medium comprising:

A5
computer readable program code means for causing a computer to partition a table into one or more portions;
